Newton Aycliffe, UK

Maximising energy efficiency with industry-leading Honey M technology

**1MW**  
System

**851.3 MWh**  
Annual Energy Output

**3,772**  
modules

**Commercial**  
rooftop PV  
system

***Rooftop installations represent a significant opportunity for businesses to increase their energy efficiency. During the installations, interaction between customers, installers, like us, and manufacturers is key to ensure a correct management and that the solution ultimately designed and implemented will produce the maximum energy yield. Working with Trina Solar and Hitachi Rail was a good example of collaboration between all parties.”***
